IIPA Sanctioned School

This class has all the advantages: truly advanced material, recent research discoveries, overcoming the typical mistakes Iridologists make; secrets of reading the darkest brown irises; what the real pros do with the science in actual practice; special Russian techniques of iris evaluation; advanced camera & imaging skills, PhotoShop diagramming, photo-enhancing and pull-down iris grid + CosmicIris® software; rare tips on how to promote your Iridology practice; many actual case histories from the GranMed archive; use of professional forms (incl. Intake, the Waiting Room Disclaimer, Live Exam Form, Lab Study, Office Follow-Up, etc.); GranMed Certification for Competency and Teaching; Apprenticeship and Interning with GranMed; dispositions and syndromes, 18 different Corneal Arcus signs and much, much more. Hear, see, feel and altogether sense the difference our multi-media course presentation makes.

No useless nonsense—just genuine, practical down-in-the-trenches valuable and effective skills. Sharpen your abilities, gain new levels of assurance and confidence, with a walk thru the whole professional process, from initial client contact to final follow-up. You come away with more than just skill. You witness the relaxed confidence and intensity that accompanies mastering a science.

### Experience the Quality

Since 1972, Grand Medicine has been clinically practicing, studying, researching and (finally) teaching Physical Iridology. We travel to many countries, interview top practitioners in the field of Iridology, and review their data. Many schools offer Iridology, but none like Grand Medicine. Our team, our experience, the quality of our products, our research, our brand and our integrity—these make the difference.
