SCLEROLOGY: Your Advantage

New to Eyology? A seasoned Health pro? Whoever you are in the health field, here's everything you need to begin or enhance your professional practice—from useable technical skills to Handbook to forms. See how markings in the whites of the eyes reveal a whole new (and valuable!) level health information that complements any health evaluation tool. While the irises focus on genetic tendency, the scleras excel at revealing body areas actively under stress—no matter how dark the irises! Together—a most powerful assessment tool. Start using what you've learned as soon as you get back to the office.

You will Learn...

...Sclerology's ideas & concepts, history & terminology, anatomy & map topography...the six different types of sclera markings....the various qualities & most important configurations of the vascular-type ("line") markings.....what the whites of the eye show & don't show...hands-on demos of the light & magnifier, camera, slit-lamp.....vital, natural holistic healing principles and protocols....practice / business tips from the pros for real success....altogether, the whole foundation is covered in this exciting "Basics" class.

Experience the Quality

Grand Medicine has been clinically practicing, teaching, studying and researching Iridology and Sclerology since 1972. The late Dr Bernard Jensen hailed Dr Leonard Mehlmauer, the founder of Grand Medicine, as one of the pioneers of Iridology and Sclerology. Our team, our experience, the quality of our products, our research, our brand and our integrity—these make the difference.
